MEMORANDUM FOR: Deputy Director of Central Intelligence

FROM: Harry E. Fitzwater
Deputy Director for Administration

SUBJECT: Central Intelligence Agency Annual Report
of Accident Analyses - CY 1982

DD/A REGISTRY
FILE: 12-2

1. Action Requested: None; for information only.

2. Background: The Safety Staff has prepared the attached Annual Report of Accident Analyses for your information. The report was prepared as one facet of the requirement in Executive Order 12196 that each agency operate an occupational safety and health management information system. A copy of the report will also be provided to each member of the Agency's Occupational Safety and Health Committee.

The summary on page 3 shows that there were 280 lost workday and nonfatal cases in 1982, an increase of forty over 1981. Twenty-five of the additional cases were the result of slips and falls, an increase of nineteen in the Headquarters area and six overseas. The increased cases resulted in an Incident Rate (IR) of 2.0 compared to 1.8 in 1981. The IR is the number of injuries and illnesses, excluding first aid, per 200,000 employee hours worked and is the yardstick used by the Department of Labor to evaluate the Federal Government's injury/illness rate. While the injuries increased to 280, I am pleased to note that the IR of 2.0, the average for the past four years, is considerably less than the Federal Government IR average of 6.4 for the same period.

The major cause of injuries (excluding first aid) continued to be slips and falls which accounted for ninety-three (93) of the injuries. Thirty-nine (39) of these injuries were incurred by employees during periods of snow and ice. Special emphasis will be given to the causes of these injuries through inspections, distribution of safety literature and contacts with the Office of Logistics and General Services Administration.

ILLEGIB

SECRET

SECRET

The fire loss of \$17,715.23 is considered minimal as \$14,000 was incurred as a result of a truck fire and \$3,400 represents losses of Agency equipment in a [redacted] warehouse fire. Losses due to motor vehicle accidents are considerably higher with \$17,000 of the total due to the loss of one motor vehicle overseas.

25X1

We will continue to strengthen the Agency's Safety and Health Program through increased inspections and additional resources.

Harry E. Fitzwater
Deputy Director
for
Administration

INTRODUCTION

1. The Central Intelligence Agency's Safety and Health Program is conducted in compliance with the Occupational Safety and Health Act, Executive Order 12196 and Title 29 Code of Federal Regulations Part 1960, Basic Program Elements for Federal Employee Occupational Safety and Health Programs. [redacted]

25X1

2. The statistics in the Agency's Annual Report of Accident Analyses for 1982 are based on accidents, fires, injuries and illnesses defined, reported and recorded in accordance with guidelines furnished by the Secretary of Labor. The report includes analyses of the incidents listed in subparagraphs a, b, c, and d which occurred during calendar year 1982 and were reported to the Safety Staff by 31 January 1983. [redacted]

25X1

a. Occupational injuries and illnesses incurred by Agency employees [redacted]

25X1

[redacted]

25X1

b. Accidents involving official and quasi-personal motor vehicles.

c. Accidents which resulted in damage to other types of Agency equipment.

d. Fires which resulted in personal injury or damage to Agency property or equipment.

3. Reports furnished by the Office of Personnel, Office of Medical Services, Office of Logistics, Office of General Counsel, and Accident Report Form 2652a forwarded to the Safety Staff in compliance with [redacted] were utilized in these analyses. [redacted]

ZUA1

DEFINITIONS

1. *Occupational Injury* is any injury which results from a work accident.
2. *Occupational Illness* is any abnormal condition or disorder caused by exposure to environmental factors associated with employment.
3. Categories of occupational injuries and illnesses are as follows:
 - a. *First Aid*—one-time treatment and subsequent observation for minor scratches, cuts, bruises, etc., which do not ordinarily require medical aid.
 - b. *Fatality*—an employee's death resulting from an occupational injury or illness.
 - c. *Lost Workday*—cases, other than fatalities, that result in the loss of one or more days from work, or one or more days of restricted activity, beyond the date of injury or detection of illness.
 - d. *Nonfatal*—cases, other than Lost Workday, that result in one or more of the following: (1) medical treatment beyond first aid, (2) diagnosis of occupational illness, (3) loss of consciousness, (4) permanent transfer to another job.
4. *Days Lost* are the workdays, after the date of the injury or illness, for Lost Workday cases that the employee would have worked but could not.
5. *Days Restricted* are the workdays, after the date of the injury or illness, for Lost Workday cases that (1) the employee worked at a permanent job less than full time, (2) was assigned to another job on a temporary basis, or (3) worked at a permanently assigned job but could not perform all duties normally connected with it.
6. *A Motor Vehicle Accident* is any occurrence involving an Agency official or quasi-personal vehicle while operated which results in death, injury or property damage of \$100 or more, regardless of who was injured or what property was damaged.
7. *Other Accidents* include incidents which result in damage of \$100 or more to Agency property or equipment.
8. *Fires* include incidents of unplanned burning which result in damage to Agency property or equipment.
9. *Incidence Rate (IR)* is the number of injuries and illnesses, excluding first aid, per 200,000 employee hours worked. The IR formula is:

$$IR = \frac{\text{Number of Injuries and Illnesses} \times 200,000}{\text{Employee Hours Worked}}$$

10. *Motor Vehicle Accident Frequency Rate* is the number of accidents per 1,000,000 miles driven. Written as a formula:

$$FR = \frac{\text{Number of Accidents} \times 1,000,000}{\text{Miles Driven}}$$

Secret

SUMMARY

1. The Incidence Rate (IR) for occupational injuries and illnesses incurred by CIA employees during calendar year 1982 is 2.0 compared to 1.8 in 1981. The increase in the IR for 1982 was due to an increase of 40 lost workday and nonfatal cases. The Incidence Rate for the Federal Government has not been received for 1982; however, the IR for 1981 was 6.1.

25X1

2. The number and severity of occupational injuries and illnesses for 1982 compared to 1981 are as follows:

- a. Fatalities, 1 in 1982; 1 in 1981.
- b. First aid cases, 397 in 1982; 351 in 1981.
- c. Lost workday cases, 122 in 1982; 98 in 1981.
- d. Nonfatal cases, 158 in 1982; 142 in 1981.
- e. Total cases, 678 in 1982; 592 in 1981.
- f. Days lost, 622 in 1982; 1,050 in 1981.
- g. Days restricted, 300 in 1982; 306 in 1981.

3. The single fatality was the result of an occupational illness which the employee contracted while serving in

25X1

4. The motor vehicle accident frequency rate is 4.6 for 1982 compared to 4.1 for 1981.

25X1

5. The fire loss was \$17,715.23 in 1982 compared to \$28,716.61 in 1981. The major loss was \$14,000 which was the result of a fire in a 5-ton truck.

SPECIAL ANALYSES

1. The first major cause of lost workday and nonfatal injuries is slips and falls, 33 percent. Seventy-four percent of these accidents occurred in the Headquarters area, 54 percent of which occurred within the Headquarters building and compound. The second major cause of injuries/illnesses is material handling, including lifting, 18 percent.

2. Sixty-seven (67) percent of the lost workday and nonfatal injuries/illnesses were incurred in the Headquarters area, twenty (20) percent in domestic areas and thirteen (13) percent in overseas areas.

3. The highest percentage of injuries/illnesses was incurred by employees in age groups 35-39 (16%), 20-24 (15%) and 30-34 (14%). These employees incurred 45 percent of the total injuries/illnesses, whereas they comprise approximately 38 percent of the Agency's employees.

4. Twenty-five (25) employees incurred two injuries each and (1) employee incurred three injuries. Five (5) of these injuries resulted in lost time from work.
